

SOC 4930/5050: Week 13 LaTeX Commands

Christopher Prener, Ph.D.

November 20th, 2017

Bibliographies Using BibLaTeX

APA

`\usepackage[backend=biber, style=apa, datelabel=terse]{biblatex}`¹ ¹ Include in the preamble.

Chicago

`\usepackage[authordate, backend=biber]{biblatex-chicago}`² ² Include in the preamble.

Link to .bib File

`\addbibresource{fileName.bib}`³ ³ Include in the preamble after the relevant `\usepackage` command.

In-Text Citations

Author(s) and year - `\cite{cite_key}`

Year only - `\cite*{cite_key}`

Include page or page range - `\cite[page]{cite_key}`

Multiple citations - `\cite{cite_key, cite_key}`

Full Citation

`\fullcite{cite_key}`

Reference Page, Cited Items Only

`\printbibliography`

Reference Page, All Items in .bib File

`\nocite{*}`⁴ ⁴ Add on the line before you have the `\printbibliography` command.

Reference Page, Custom Title

`\printbibliography[title=title name]`

Rotating Tables

```
\begin{landscape}5
```

```
<<<< TABLE OUTPUT >>>>
```

```
\end{landscape}
```

⁵ Make sure you load the `pdflscape` package in your preamble.
